SINTRIX® TECHNOLOGY: IT'S THE SMALL THINGS THAT MAKE A BIG DIFFERENCE.

Microscopic silica spheres evenly surround every individual carbon fibre filament providing a matrix of strength throughout the rod.

Never has that statement held more truth than with the development of SINTRIX® technology.

All carbon rods utilise carbon fibres that are bonded together by an adhesive resin. The resin material used in SINTRIX® is produced by 3M®, it is a unique and patented material incorporating silica nano spheres which provides two distinct benefits.

Firstly the microscopic silica spheres are able to evenly surround every individual carbon fibre filament providing a matrix of strength throughout the rod. Secondly, being spherical, the silica particles are able to resist pressure and compression from any angle. This is particularly important because it is under compression forces, on the underside of a bent rod, rather than tension forces, on the outside of the curve, that carbon fibre is most likely to weaken and potentially break. So by resisting compression better, SINTRIX® rods are stronger.

In developing SINTRIX® our specialist composite engineers and rod designers spent over two years experimenting with different types, and mixes, of carbon fibres combined with varying levels of 3M® nano silica resin. They also discovered that the normal manufacturing processes

associated with carbon fibre rods had to be significantly changed in order to get the best from the new 3M® resin material. The final results were astonishing with up to 60% increases in strength and up to 30% savings in weight.

Driven by our passion and determination to always push the boundaries—part of Hardy's DNA since 1872—we now offer varying levels of SINTRIX® technology across our rod range, each level brings significant and tangible benefits over traditional carbon fibre construction.

SINTRIX®: THE SUCCESS STORY.

When I received the first prototype blanks rolled from SINTRIX® material in late 2009 I was shocked. I've held and flexed literally thousands of rod blanks over the years, and when I held the 9ft #10 saltwater rod, I was immediately taken aback at the lack of weight for a #10 – it just instantly felt 'right'.

Our early work on the material with our sister company Hardy Advanced Composites had indicated considerable increases in compressive strength and impact resistance where possible, but even our material engineers were not prepared for the results. Following the first day of testing, we even asked the manufacturer of our compressive strength tester to re-calibrate the machine as the results it had produced were, to quote one of our testers, "nonsense".

There was nothing wrong with the testing machine, the blanks netted out at close to 60% stronger than our calculations suggested they ought to be, and from that point on the entire team focused on the development of what became the Zenith and Proaxis series of rods and the refinement of what was to become SINTRIX® technology.

I could tell you about the testing trips to the Florida Keys fishing for sharks with medium-weight Trout rods, or the actual fist fight that took place on the dockside between two guides over a test rod, but I think some of these quotes from icons and pioneers in the sport tell the impact that SINTRIX® actually made far better than I could.

Howard Croston, Hardy Product Manager and England International.

My rods of choice when chasing the huge pike of Chew Valley, pursuing Gold representing England competitively or filming saltwater fishing adventures have one

thing in common—they all feature SINTRIX® material. This revolutionary technology has changed the way I approach the diverse challenges of my lifelong passion.

**John Horsey, Hardy ProTeam
Member and Professional Guide**

The ultra-lightweight and incredible strength of the Hardy SINTRIX® rods give me the superb line handling that I need to achieve absolute control of line placement and mending, while also allowing me

to fight the fish aggressively and remain in perfect touch with every part of the line/leader system.

**Gary Borger, Hardy North American
ProTeam Member**

It seems like a no-brainer now but the introduction of SINTRIX was a bold step. It seemed dull, a little geeky, I was sceptical that a better resin system could be exciting, could change rods, could make better rods, but it does.

Hardy engineers and designers neatly and expertly anticipated exactly how important SINTRIX® would be for the future of their fishing rods... and, by the way, set the direction for performance rod design in general.

**Magnus Angus, Chief Reviewer
Fly Fishing & Fly Tying Magazine**

SINTRIX rods continue to be a revelation – from that first 9ft 5wt Zenith, that won our annual 5-weight shootout back in 2011, right through to today, I personally

still think the 8ft 6in Zenith is the finest 4-weight fly rod you can put your hands on.

**George Anderson, Owner of
Yellowstone Angler, USA**

THE EVOLUTION OF SINTRIX®

SINTRIX® 330, 440 and 550

Since the breakthrough in 2009 we haven't stopped refining and developing SINTRIX® technology. Today we offer three distinct levels of performance each with their own unique benefits incorporated into our exciting 2016 product line.

Up to 30% increase in compressive strength over traditional carbon fibre.

Jet Switch

NEW FOR 2016

Jet

Jet Double Handed

Up to 60% increase in compressive strength and up to 30% weight reduction over traditional carbon fibre.

NEW FOR 2016

Zephyrus SWS

NEW FOR 2016

Zenith Double Handed

Up to 60% increase in compressive strength and up to 30% weight reduction over traditional carbon fibre, with an increase in GPA (stiffness) of up to 15% over SINTRIX® 440.

Wraith

NEW FOR 2016

FRESHWATER, ALL WATER AND SALTWATER

Tactical and Extreme

A number of Hardy rods within our series feature T or E designations.

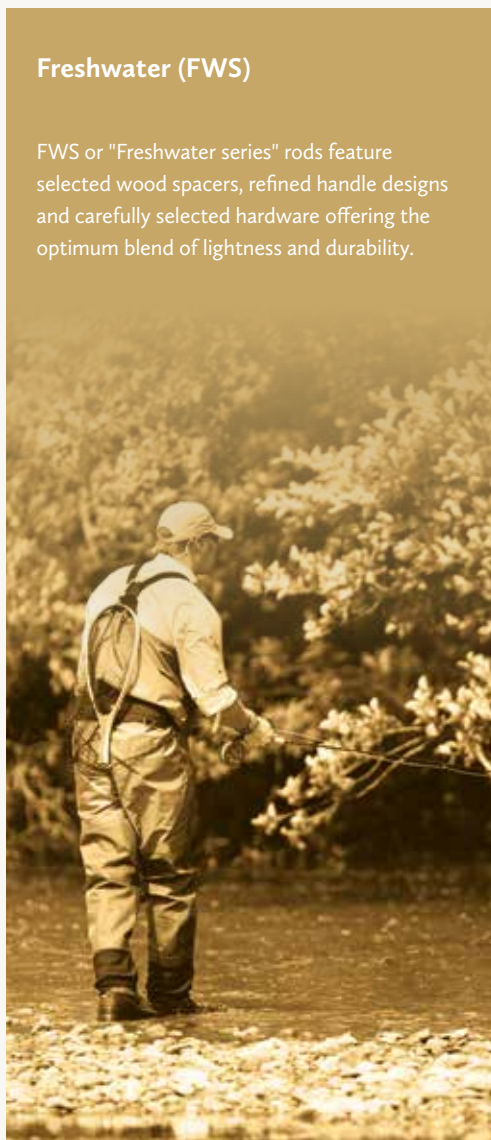

T designated rods are designed with highly tactical situations in mind where a careful combination of line feel, recovery and carefully calibrated blank stiffness are required to meet specific challenges.

Rods designated with an E are typically more at the 'extreme' end of the scale where ultra-fast actions and high recovery are specifically required.

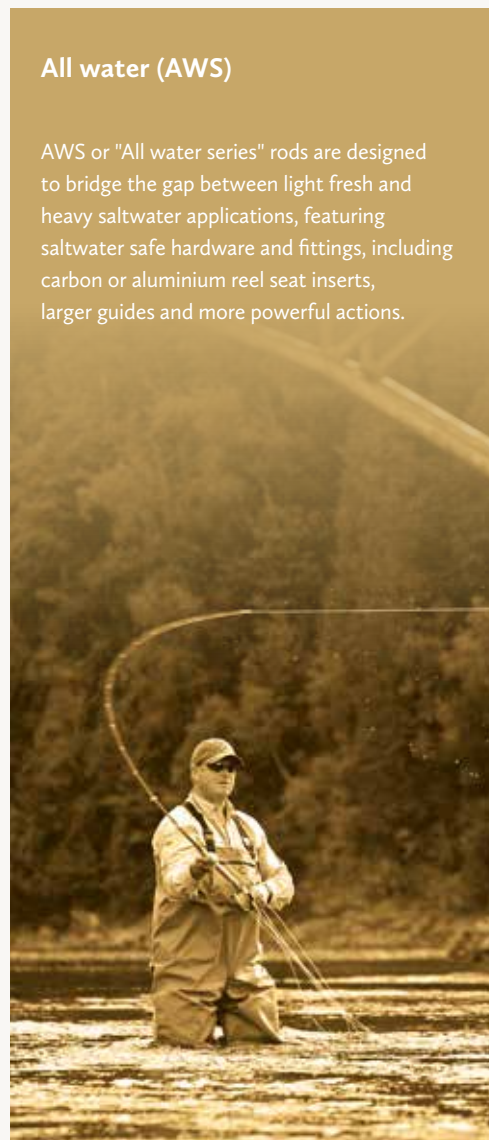

Freshwater (FWS)

FWS or "Freshwater series" rods feature selected wood spacers, refined handle designs and carefully selected hardware offering the optimum blend of lightness and durability.

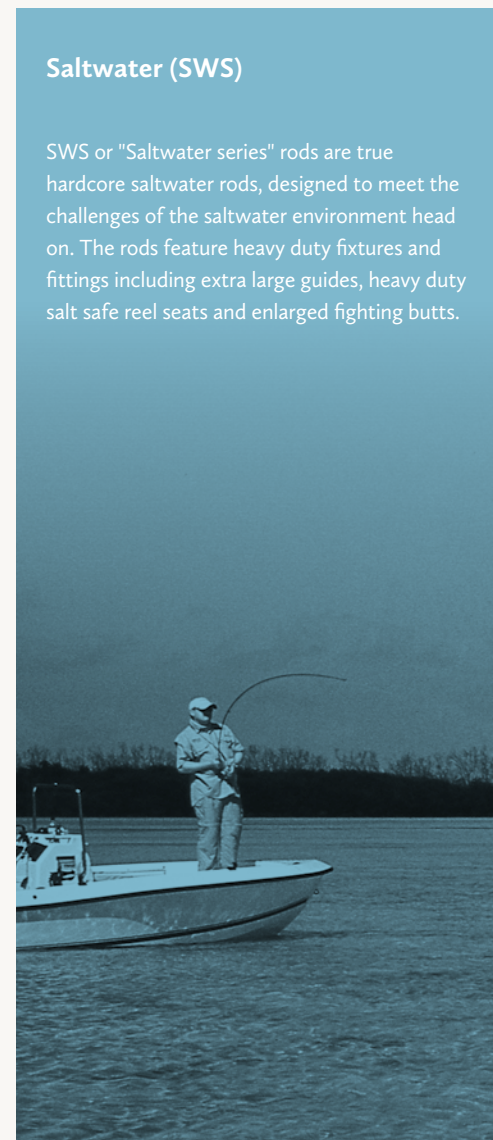

All water (AWS)

AWS or "All water series" rods are designed to bridge the gap between light fresh and heavy saltwater applications, featuring saltwater safe hardware and fittings, including carbon or aluminium reel seat inserts, larger guides and more powerful actions.

Saltwater (SWS)

SWS or "Saltwater series" rods are true hardcore saltwater rods, designed to meet the challenges of the saltwater environment head on. The rods feature heavy duty fixtures and fittings including extra large guides, heavy duty salt safe reel seats and enlarged fighting butts.

Trophy Brown Trout hugging the structure tight to a distant river bank, Rainbows smashing fry on the ripple line in a vast mountain lake, Sea Trout crashing in the void of the darkest summer nights. Adrenaline fuelled moments that require an adrenaline fuelled fly rod. Wraith with SINTRIX® 550 technology generates incredible line speed and unprecedented tip recovery for the longest of casts, yet retains a degree of line control and feel that is almost impossible to translate into words. Load one up and hold on.

SINTRIX
440

FOUR
SECTION

Whether it's six feet or sixty six, when your target is to hit a moving shadow dead centre between the eyes with a weightless piece of fluff, accuracy starts to take on a whole new meaning. Zephrus, with SINTRIX® 440 technology, combines the featherweight touch and line feel required to fool a midge feeder under the rod tip, with the power to hit a slab rainbow at full range. Thanks to advanced design, industry leading materials and, above all, a passion for creating the finest high performance fly fishing tools available, all you need do is fire and don't forget to strike.

FIRE AND FORGET
FOR THE FLY
ANGLER

The salt is a world of extremes, encompassing the whole spectrum of fly rod challenges in one beautiful but harsh and unrelenting theatre; its inhabitants display all the traits of their home from the paranoid nervousness of the bonefish to the thug-like, raw power of the GT.

Whatever you chase from Permit to Pollack and every species in-between there is absolutely no room in the salt for anything other than an absolute game changer.

Zephrus SWS with SINTRIX® 440 technology takes the multi award winning, record breaking Proaxis blank design to the next level of saltwater evolution. More feel, more power, more strength, more refinement and even more of a match for the ultimate fly rod challenge—pick one up and change your game for good.

FOUR
SECTION

- User-friendly refined high performance rods with SINTRIX® durability
- SINTRIX® 330 blank construction in 4 section configuration
- Refined middle-to-tip action
- Reverse half-wells handles: Burl wood reel seat spacer with anodised aluminium thread and twin-uplock function
- Full-wells handles: Full anodised aluminium fitting with twin up-lock function
- Fuji® butt guides with hard chrome snake intermediates
- Clear 'pearl grey' blank finish with silver highlights and section line up marks
- Supplied with cloth rod bag, and a hard cloth-covered Hardy rod tube

REFINED ALL-ROUND PERFORMANCE

The Jet series brings refined middle-to-tip actions, low in-hand weight and sharp tip recovery with a smooth and powerful feel.

Fully fitted with high quality custom components and built to exacting Hardy standards, there is a Jet series rod to cover every application from small stream Trout to Salmon and Sea Trout.

All Jet rods feature the industry leading and award winning SINTRIX® technology in our 330 configuration and were designed and developed in our advanced R&D centre in Alnwick, England.

The Shadow® range delivers the cutting edge in traditional carbon technology in a high performance user-friendly package.

Designed and built around an advanced mandrel design to gain the optimum balance between power, finesse and durability, and with a high modulus carbon core these rods deliver high line speed and the ability to control powerful fish with delicacy and authority.

THE ULTIMATE IN
REFINED HIGH
PERFORMANCE

Marksman 2 S-Series Double Handed

Designed with input from our Global ProTeam including former World Champions and some of the best Spey casters in the world today. The Marksman S-Series rods perfectly suit the modern underhand style of casting whilst retaining the classic feel and refinement of a Hardy.

Although primarily designed for shorter lines the Marksman S-Series can cope easily with mid and longer belly fly lines when required.

- Crisp, fast action with smooth bend into the butt for high performance casting
- M40 / M46 carbon blank in a four section design
- Fujii® stripper guides and hard chrome snake guides
- Down-locking alloy reel seat with carbon spacer
- Titanium grey colour with red trim
- Section line up dots
- Scandinavian style shaped handle in AAAA grade cork
- Supplied with rod bag, alloy tube, protective sock and stoppers

- Clear 'pearl grey' blank finish with silver highlights and section line up marks
- Supplied with cloth rod bag, and a hard cloth-covered Hardy rod tube

Jet Switch

High banks, tight overhangs, distant seams that require precise line control—all challenges for the “short rod”. Enter Jet Switch, a short two-handed configuration that can be fished with both single and two-handed techniques. Super light and responsive, perfect for single-hand manipulation of fly and line during the swing but equipped with a fully functional two handed grip for Spey casting techniques. Ideal for presenting bulky flies and rigs with ease. Jet Switch brings the advantages of SINTRIX® 330 technology into the switch rod category—increased impact resistance, reduced weight and increased compressive strength.

- SINTRIX® 330 blank construction
- Fuji® guides
- Easy loading fast recovery blank design
- Bar stock 6061 aluminium reel seat

A TRADITION OF EXCELLENCE

Hardy has been hand-crafting reels in Alnwick for over 120 years, a record that no other tackle manufacturer can ever hope to match. Tradition is baked into our DNA as deeply as the finish on a Perfect reel, but it can only exist in partnership with the constant quest to refine our designs. More than anything else, it is innovation that lies at the heart of the ethos that drives our engineers in a constant search to improve our tackle—without the unique chemistry that binds them and our time-served craftsmen together, a product like the modern Perfect reel could never have been developed.

Wide Spool Perfect

Beautiful classic fly reels, the latest revision in over a century of the Perfect. This model features, a time proven check system, and that classic Perfect sound, hand-crafted in Alnwick, England.

Ever since Forster Hardy was first granted a full patent for the Perfect reel design in 1889, our engineers have been constantly striving for ways to improve on perfection, tweaking and adjusting to bring you what we believe are the best reels in their class to date. After all, if we offered anything less, it would not be a Perfect.

- ✎ Made in Alnwick, England
- ✎ The all time classic fly reel for the discerning traditional fly angler
- ✎ Engineered and hand crafted from bar stock aluminium with a naval brass 1 piece spindle and stainless steel ball bearings
- ✎ Standard arbor design and large line capacity
- ✎ Time proven, adjustable check system with that traditional 'Hardy sound'
- ✎ Deep anodised for strength and durability; smooth gunmetal grey satin finish
- ✎ Easily changed from left to right hand wind
- ✎ Supplied in a soft leather, sheepskin lined reel pouch

Bouglé

Launched in 2013 to celebrate the reel's 110th birthday, this Bouglé is one of the best yet – with its rolling pillar; reversible click check; naval brass bush and spindle; and its hand polished, deep anodised 'pearl silver' finish. This Bouglé reel is already one of the classics.

Made by time served Hardy Bros. reel makers here in Alnwick, England, this Bouglé reel comes presented in a beautiful, UK made, soft leather, sheepskin lined reel case.

- Made in Alnwick, England
- A stunning piece of classic design, aesthetics and performance combined
- Engineered, hand crafted and polished in bar stock aluminium finished in pearl silver
- Traditional standard arbor
- Sweet sounding, wide ranging check system
- Naval brass bush and spindle
- Easily changed from left- to right-hand wind
- Spools interchangeable with Bouglé Mk VII, VI, V and IV
- Supplied with Hardy Bros. soft leather, sheepskin lined reel pouch

HUGE CAPACITY AND BULLET-PROOF CONSTRUCTION

Collaboration between some of the finest reel designers in the industry and the ultimate saltwater predator Andy Mill, has produced a lightweight, waterproof sealed, beast of a fly reel producing incredible stopping power. A strong and surprisingly light reel designed to perfectly balance the Zephyrus SWS rods.

This reel features multiple carbon brake pads, 7 point waterproof sealing, and secure yet rapid tool-less spool change. With all the power required to stop hard fighting saltwater species, the Fortuna X also makes a great reel for two handed Spey rods thanks to its huge capacity and bullet-proof construction.

Fortuna X

- The ultimate offshore saltwater and heavy duty freshwater fly reel
- Aerospace grade 6061 anodized bar stock aluminium
- Mid arbor design for increased capacity
- Low inertia multi carbon 12 side disc brake system generates a maximum 32lb* of drag

- 7-point sealed drag system—fully saltwater safe
- Captivated, quick release spool
- Simple left to right hand conversion with supplied tool
- Supplied with neoprene pouch

ULTIMATE
SALTWATER
PERFORMANCE

Ultralite CA DD

NEW FOR
2016

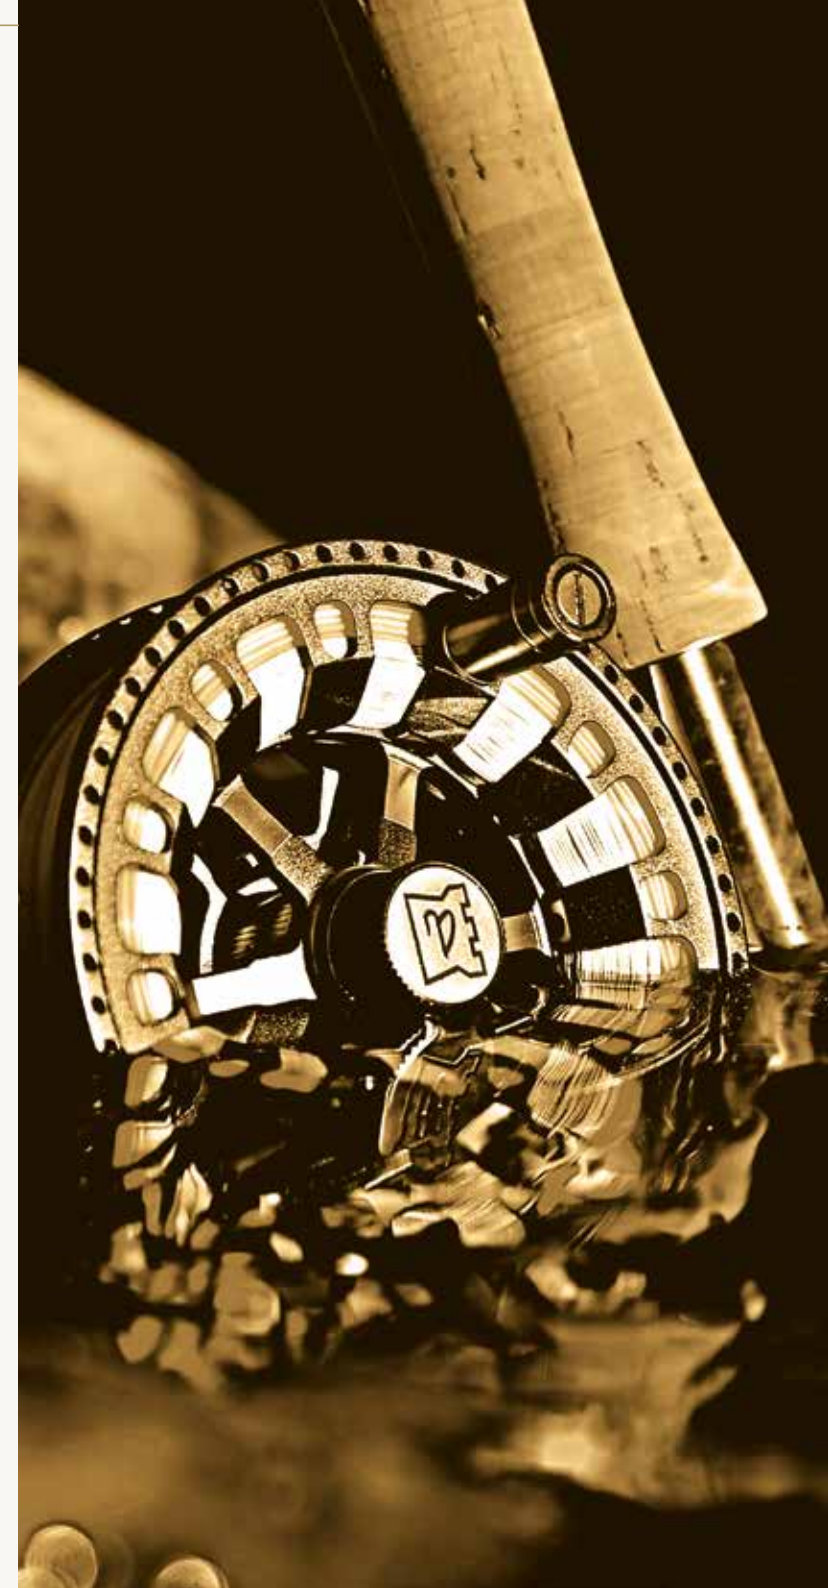

One of the sweetest sounds in fly fishing is the scream of a well-engineered reel smoothly surrendering line to a hot fish as it heads for the horizon... but when that hot fish turns tail and runs right back down the barrel at you, the ability to pick line up and stay in contact becomes paramount to success. The Ultralite CA DD reel series is designed with an ultra large, conical arbor giving incredible line pick up and reducing drag gain on the longest runs, whilst the 360 degree colour coded drag system delivers consistent drag pressure and the ability to always stay one step ahead of the twists and turns of the hottest fish.

ULTRA-SMOOTH
PERFORMANCE,
ULTRA-FAST PICKUP,
ULTRALITE BY DESIGN.

- Ultra large arbor

Ultralite MA DD

NEW FOR
2016

Trophy fish the world over have one thing in common—they are considered trophies because they do not get caught every day. A weak knot, a sticky drag, not enough backing, there are a dozen things that can go wrong in the fight with the one you don't want to get away.

The Ultralite MA DD series of reels features a smooth 360 degree colour coded drag for faultless control and easy reference during the fight, and a medium arbor spool designed for anglers who like the comfort of an extra reserve of backing or the extra capacity needed to fit speciality fly line tapers for Pike, Salmon, trophy Trout or even switch style fishing—Ultralite MA DD designed to go the distance.

CAPACITY FOR WHEN YOU NEED TO GO THE DISTANCE.

- Bar stock 6061
- Two tone anodising
- 360 degree colour coded drag
- Captive spool release
- Mid arbor design for high line capacity

Ultralite CLS

The Ultralite® CLS sets a new standard in cassette system reels, loaded with industry leading features and innovative design. The CLS locking system provides efficient, secure spool change at the flick of a switch, and the unique line identification feature offers permanent yet reusable line identification. All this combined within a stunning aesthetic design means this reel is the ultimate solution for the technical angler—a lightweight solution to carrying multiple line types, allowing anglers to overcome fast changing water conditions and feeding behaviour.

- Ultimate versatility and practicality from an award winning design
- Aerospace grade 6061 anodized bar stock aluminium cage and frame with modified polycarbonate spools
- Large arbor design for rapid line recovery
- Centralised enclosed disc drag system suitable for all freshwater applications
- Industry leading cassette locking system (CLS) – fast, secure and reliable
- Tool-less conversion from left to right hand wind
- Fly line ID system – permanent/reusable line identification system
- Supplied with three spools, and sufficient ID pins to mark up three lines
- Hardy neoprene reel and spool case included

Mach Multi Spey

Spey line kit supplied with 3 interchangeable tips: floating, intermediate and sinking (wet 2). The ideal solution for Salmon anglers fishing at different depths. The short dynamic nature of this fly line leads to an ease of casting, as well as efficient presentation of flies, both large and small, even in the most trying conditions. Tick all the boxes with one line.

- Super strong welded loops on both body and tips
- Designed by Ian Gordon to match the latest Hardy and Greys Salmon rods
- Line identification marker welded into main body and tips – never mix your lines or tips up again
- Body designed to handle longer/heavier aftermarket tips and additional polyleaders if required
- Advanced taper gives effortless high performance casting on a range of rod actions
- Seamless transition from low diameter running line to aggressive rear taper for increased line shoot whist maintaining in flight stability
- Supplied with 3 interchangeable tips in tips wallet (floating; intermediate; wet 2)
- Running line diameter 0.043"

Lengths and weights of Working Head include tip

Mach Mid Spey

These Salmon lines have been designed for the angler who likes the long range mending and line control that only a full fly line design can deliver. With individual line size head lengths and tapers these lines are an awesome high performance casting line that does not require perfect technique to generate outstanding results. The Mach Spey series of lines have an advanced head design that delivers both high performance results and ease of casting to anglers of all abilities who prefer a full line design. Featuring a refined taper so that polyleaders can also be added with no reduction in performance.

- Refined taper so that polyleaders can be added with no reduction in performance
- Designed by Ian Gordon to match the latest Hardy and Greys Salmon rods
- Weight forward taper
- Each line features a specific head length and modified profile to achieve maximum efficiency
- Head lengths from 48' to 60' depending on size
- Vivid colour change helps visually judge optimum loading point at the rod tip
- Supple yet stable surface coating with a supple core ensures easy handling and low

Mach Trout

Mach Trout

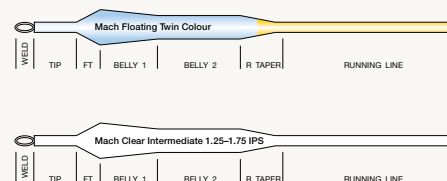

The Mach Series Trout lines feature a heavily-engineered compound taper that offers distance, control and presentation from both short to maximum ranges. The lines are built on a low-memory supple core with a durable, liquid slick, PVC impregnated coating. They also feature welded tip loops. And, of course, they are AFTM size specific to meet the needs of the most demanding single handed anglers.

Marksman

Designed specifically to meet the demands of modern angling on both still and running waters. Supplied with high quality braided loops and totally AFTM compliant. We love the soft, subtle, braided core to the lines that means line memory is a thing of the past.

Premium

A straight forward, no nonsense range to meet virtually all fly fishing challenges. These lines are durable, long casting and offer easy control. They have next to no memory and give you the near-perfect presentation you need.
